SUMMARY

Industrial Engineering graduate (3.94 GPA) with four years of hands-on operational experience in Indomaret Group's bakery supply chain, responsible for sales, distribution, and logistics across 6,500+ retail outlets. Possesses deep practical understanding of short shelf-life, daily freshness management, high-frequency delivery, and return rate optimization. Resourceful operations professional who bridges the gap between operational needs and technical execution, with a proven track record of designing, building, and deploying 7 production systems currently running daily across 6,500+ stores.

WORK EXPERIENCE

Indomaret Group | Factory Support Junior Manager | Oct 2024 – Present

- Designed and deployed 7 production systems — demand forecasting, inventory control, IoT monitoring, logistics tracking, and sales intelligence — all built and maintained solo, serving 6,500+ stores daily.
- Led a 60-person team across factory operations, sales, logistics, and distribution.
- Automated core workflows: demand forecasting from 4-5 hours of manual work to a fully automated daily run; stock reconciliation from a full day to under 5 minutes.

Indomaret Group | Acting Factory Support Junior Manager | Dec 2022 – Sep 2024

- Took on full manager responsibilities ahead of formal promotion.
- Delivered the factory's data infrastructure, including Power BI sales dashboards used by leadership daily and the initial demand forecasting pipeline.

Indomaret Group | Management Development Program | May 2022 – Nov 2022

- Rotated through all factory functions, including production, sales, logistics, and distribution, building the operational context used as the foundation for future technical systems.

Shibaura Institute of Technology | Sandwich Program — Academic Exchange | Aug 2021 – Jan 2022

- Selected for a semester-long academic exchange in Japan as one of a small cohort chosen from the university.

TECHNICAL PROJECTS

- **XGBoost Demand Forecasting:** Generated a 3-day sales forecast across 6,500+ stores with 345,011 records per run, fully automated. Replaced 4-5 hours of daily manual forecasting work.
- **Inventory Control System:** Built an end-to-end bakery ERP replacing disconnected Excel files, covering inventory, costing, work orders, anomaly detection, and reorder planning. Reduced analysis time from a full day to under 5 minutes.
- **IoT Environment Monitor:** Created factory environment monitoring via ESP32 and SHT31 sensors, replacing manual logbooks with automated readings across cooling and packing rooms.
- **AutoWeigh:** Connected legacy industrial scales to IoT via an RS232 bridge with zero hardware replacement at under Rp 150,000 per node. Enabled real-time weight streaming with anomaly detection.
- **Store Visit Map and Planner:** Developed a mobile-first map for 6,500+ distribution points featuring five view modes, Held-Karp TSP route optimization, and lasso area selection. Replaced daily WhatsApp store lists and is actively used by 10+ sales reps daily.
- **PowerBI Daily Dashboard:** Delivered sales intelligence used by leadership every morning, featuring competitor benchmarks, regional breakdowns, and trend alerts.
- **Crate Tracking System:** Tracks 9,000–13,000 crates daily across 11 distribution centers. Automatically flags shortfalls on import, previously requiring a full day of manual investigation.

EDUCATION

Widya Mandala Catholic University Surabaya | Bachelor's Degree in Industrial Engineering | 2018 – 2022

- GPA: 3.94 / 4.00 — Best Academic Achievement Graduate, top of cohort.
- Thesis: Predicting Tourism Recovery after the COVID-19 Pandemic in Bali — A System Dynamics Approach.

SKILLS AND TOOLS

- **Analytics:** Python, SQL Server, SQL Express, PowerShell, XGBoost, Power BI, Excel, DAX.
- **Systems:** React, TypeScript, FastAPI, Supabase, ESP32, RS232, Leaflet.js.
- **Domain:** Bakery supply chain, demand forecasting, inventory management, IoT, retail distribution.

HONORS AND AWARDS

- Best Academic Achievement Graduate — Widya Mandala Catholic University Surabaya, 2022
- 1st Place — Statistics Competition (2× winner)
- 2nd Place — Operational Research Competition
